

ENERGY 4800

Actual Size

FOR VERY LONG PERIODS OF SUSTAINED ACTIVITY

EXTENDED ENERGY: Contains a high level of fatty acids (30%) to provide a large amount of energy that can be used gradually over the endurance period to maximise performance in sporting and working dogs with very long periods of sustained activity.

• SUSTAINED PERFORMANCE

Formulated exclusively for performance in sporting and working dogs with a dedicated combination of nutrients to help support healthy joints (EPA/DHA, glucosamine, chondroitin) and a healthy digestive system. Enriched with a blend of antioxidants tailor-made to help neutralise free radicals produced during sustained activity.

• MUSCLE CONDITION

Activity increases the need for oxygen delivery to muscles and protein turnover. With a protein content of 32%, ENERGY 4800 contributes to maintaining muscle mass and blood capacity to deliver oxygen to muscles.
